CyDefSIG: Cyber Defence Signature Sharing Platform, version: 1.1.1

Table of contents

General Layout

The top bar

The top bar's only interactive part is a link to the MISP system itself – this will redirect the user to the default view of the site, which is the List Events view.

The left menu

This menu contains all of the main functions of the site as a series of buttons.

- **New Event:** Allows you to create a new event.
- **List Events:** You can browse all the currently stored events here.
- **List Attributes:** You can browse all the currently stored attributes of events here.
- **Search Attributes:** Search for and filter a list of attributes.
- **Export:** Export various types of data from the system for NIDSs or other uses.

Global Actions

- **News:** Read about the latest news regarding the MISP system
- **My Profile:** Manage your user account.
- **Members List:** View the number of users per organisation and get some statistics about the currently stored attributes.
- **User Guide:** A link to this user guide.
- **Terms & Conditions:** View the terms & conditions again.
- **Log out:** Logs the current user out.

Sync Actions

- **List Servers:** Connect your MISP server to other servers, or view and modify the currently established connections.

Administration

- **Regex:** Create, modify or delete Regex entries, which will be used for altering newly entered attributes.
- **Whitelist:** View and manage the list of whitelisted addresses.
- **New User:** Create an account for a new user.
- **List Users:** View, modify or delete the currently registered users.
- **New Role:** Create a new role group for the users of this server, controlling their privileges to create, modify, delete and to publish events.
- **List Roles:** List, modify or delete currently existing roles.

Audit

- **List Logs:** View the logs of the server.
- **Search Logs:** Search the logs by various attributes.

The main area

This is where all the views (navigated to via the menu buttons) will be displayed. In general, there are two main view types, information views (which list the currently stored data and allow you to modify it) and form views (allowing you to enter or alter data). All lists are organised in such a way that all the information columns are on the left and every line of data can be modified or viewed in more detail on the right–most column, titled "Actions". All lists display a certain set number of the most recent items, but page control buttons at the bottom allow you to browse older entries.
The bottom bar

Contains a link to download the gpg key used for encrypting the e-mails sent through the system and the current version number – if you are logged in.
